## Material Guide

### | DUAL DROP

### | DOME

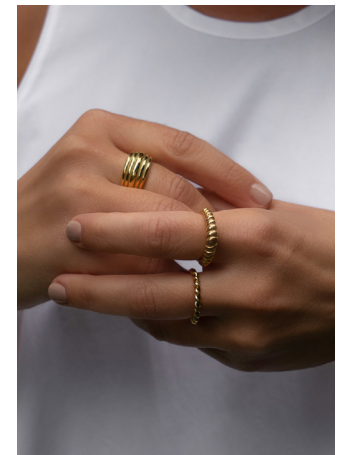

### | FLUID HOOP

When sterling silver is coated with a thick gold plating it is called gold vermeil. We choose gold vermeil because it has a bright and shiny finish that is ideal for delicate designs.

## FOREVER LASTING

- RINGS, EARRINGS & MORE

Every piece from our Forever Lasting jewellery collection features stainless steel. The advantage of stainless steel over sterling silver or any other metal is that stainless steel does not tarnish nor corrode by chemical reaction with water or other substances like perfume or creams.
